

WASHINGTON- Today Congressman Lee Terry co-signed legislation which declares that for purposes of United States public policy human life begins with fertilization. The bill, "Life Begins at Fertilization Bill", H.R. 227, was introduced by Congressman Paul Broun of Georgia.

"I believe in the sanctity of human life and I will defend it any way possible," said Congressman Terry. "I have solid pro-life record and I will continue to fight for the rights of the unborn."
